DETAILED ACTION

Response to Amendment

1. The amendment filed on 5/29/2007 has been entered.

Double Patenting

2. Applicant is advised that should claim 36 be found allowable, claim 38 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 35-38 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention.

Firstly, the specification is silent regarding a pair of interior lining members each of which is cut into a boot shape, wherein said interior lining members are stitched edge to edge together to form stitching edges, and wherein said stitching edges of said interior lining members are further thermoplastically seamed together to form said shoe lining structure for fitting into said outer shell of said boot. Rather, the specification simply refers to cutting and thermoplastically seaming a foaming cushion layer into a shape such as a boot.

Secondly, the specification is silent regarding a shoe lining structure comprising a pair of interior lining members wherein each of said interior lining members consists of a sheet-like waterproof and air breathable foaming cushion layer, a lining layer integrally attached to one side of said foaming cushion layer, and a cover layer integrally attached to another side of said foaming cushion layer. Rather, the specification simply refers to a shoe lining structure comprising a single interior lining member consisting of a sheet-like waterproof and air breathable foaming cushion layer, a lining layer integrally attached to one side of said foaming cushion layer, and a cover layer integrally attached to another side of said foaming cushion layer.

Response to Arguments

5. Applicant's arguments have been considered but are moot in view of the new grounds of rejection.

Conclusion

6. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
